Hobbies

Profile Summary

Versatile Full Stack Developer skilled in building end-to-end web applications using both Java-based backend technologies and the MERN stack. Experienced in developing robust server-side logic with Java, Spring Boot, REST APIs, and creating responsive, high-quality interfaces using React, JavaScript, HTML, CSS, and modern UI libraries. Proficient in working with databases like MongoDB and MySQL, implementing secure authentication, and integrating third-party services. Strong understanding of software architecture, clean code practices, and agile development workflows. Passionate about problem-solving, writing scalable code, and delivering efficient full-stack solutions with real-world impact.

Projects

Hospital management syatem

31 Days

Hospital Management System — A Java Swing and MySQL based application designed to manage hospital operations like patient registration, doctor records, and appointment scheduling with secure login and database integration.

FutureBridge

58 Days

FutureBridge is a web-based fund collection platform developed to support children in need. It enables secure online donations, transparent tracking of funds, and user-friendly engagement for donors. The project integrates modern web technologies to provide a reliable and impactful fundraising solution.

Password valid

5 Days

- Utilized TypeScript to enhance code quality and maintainability in the project

- Implemented strong typing to reduce runtime errors and improve development efficiency

E-commerce web

10 Days

- Developed responsive web applications using MERN stack (MongoDB, Express.js, React.js, Node.js)
